

# Assist America® Mobile App Now Available in the Android Marketplace

The Assist America® Mobile application for Android provides members with a one-touch connection to our Operations Center and access to pre-trip information and Assist Alerts, simply by logging in with their reference number. Non-members can learn more about the company, as well as read service descriptions and find information for students.

The Android application joins the website optimizations already available for iPhone and Blackberry users through Assist America Mobile. This innovation is part of Assist America's ongoing commitment to its customers to provide the highest level of quality and relevance for our services. Safe travels!
